

Reasoning with Ethics

OCTOBER 15, 2019

A Project of The School for Ethical Education | www.ethicsed.org

Ethics in action creates character.

Use this blog to:

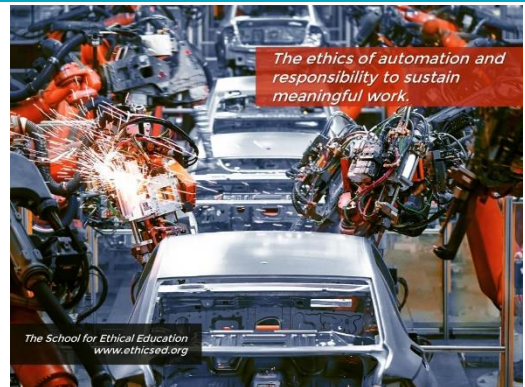

1. Lead class discussions in social studies, civics, ethics or advisory classes.
2. Teach students skills to analyze cases with core ethical values.
3. Recognize skills in support of SEE's Tri-Factor Model of ethical functioning.

The Ethics of Automation

Will artificial intelligence (AI) and automation create or destroy jobs? It clearly can do both and there are plenty of stories and concerns about the loss of many jobs (cashiers to truck drivers) and the optimistic vision of AI creating whole new job sectors. Several links are provided below for students to research the question further.

SEE asks students to consider whether automation should be considered with an ethical lens. If a retailer or trucking firm could automate and have higher profits, should any consideration be given to the employees who will lose their jobs? Is there only an obligation to the company's profit or is there an obligation to employees and society to help retrain or keep people gainfully employed?

Students today will be the managers of tomorrow who make the decisions about investment in employees. There are organizations like Conscious Capitalism that argue that business in the modern era must focus beyond profit to be sustainable by balancing the interests of all stakeholders. What core values are demonstrated if business leaders choose to include a concern for their employees in their automation plans?
